EVAI

Smart Charging for High-Demand Environments

EVAI is the smart AI-powered operating system for multi site organizations to ensure they have full control over their EV charging and energy strategy at every site.

- Full pricing policy control
- Automated payment processing
- Driver authentication control
- Automated Carbon credit recording
- Smart energy management
- AI management reports and tools

We make EV adoption feel easy — because it should be.

From busy commercial sites to sprawling fleets to high-rise residential builds, we've helped set up EV charging in just about every scenario you can imagine. We make sure your setup does exactly what you need it to — and we'll introduce you to the right people to get it done right.

Oh, and yes... we built the software for that too.

Features:

|		
Quick Startup	Power Management	Reports & Analytics
System Notifications	Cloud Dashboard	Remote Diagnostic & Maintenance
Payment & Billing	Plans & Pricing	Hardware Agnostic (OCPP)
User Access Control	AI energy Analysis & Optimization	

We help setup EV charger access with the flexibility you desire

We know that EV charger access needs to be flexible to meet various different situations. We allow you to setup charger access the way you see fit. Want some chargers to be free? Want different fees for different groups of people? We've got you covered.

You can also mix and match how you want to allow for charger activation:

Mobile Application
Yes, it's yet another APP, but some people genuinely want it, Set it up once, use your phone to activate.

RFID cards & FOBs
Use RFIDs for quick and convenient access to the EV chargers. Simply tap your card to start charging, making the process smooth and hassle-free.

Scan and Go: QR code
Simply use your smartphone to scan the QR code at the station for quick and easy access — no app or card required. Great for guest charging as well.

We help facilitate Carbon Credits

Your building, Your carbon Credits

We believe in complete ownership of your sustainability efforts. That's why we have a simple policy: '**Your building, your carbon credits.**' We don't take a percentage; every carbon credit generated **belongs entirely to you**. With EVAI, your contributions to sustainability are fully recognized and rewarded.
